# PPKAS

Whitepaper

v2.00

1. Introduction

Why Kaspa

Kaspa, the world's fastest blockDAG and fastest scalable decentralized open source PoW, that solved the famous blockchain trilemma, has migrated to the new Rust codebase and got its Kasplex protocol with the ability to create its own tokens (KRC-20 standard) and NFTs (KRC-721, WiP). We want to use this chance to bring the technological marvel that is Kaspa to as many people as possible and greatly expand the project's community.

Why we (mission of the PPKAS project)

Our team has been in Kaspa ecosystem almost since the first day of network launch and has accumulated enough knowledge and experience that can now be transformed into a new ecosystem - the ultimatum meme token **PPKAS** and a large-scale multifunctional application with entertaining and educational content that will help you immerse yourself in the amazing world of Kaspa.

2. Token

The PPKAS are a high-tech race of sleek turquoise creatures with some anthropomorphic traits. They inhabit the vicinity of the red supergiant Alpha Orion (better known as Betelgeuse). Our space hero is brave and energetic, he is always ready for adventure and new discoveries, and can come to the aid of anyone who needs new knowledge about Kaspa.

PPKAS token (ticker PPKAS) is the basis of the whole ecosystem. The tokens are used to build the gaming, entertainment and educational areas of the multifunctional application, as well as various activities - airdrops, marketing and listings on DEX and CEX exchanges - because PPKAS wants to inform as many people as possible about its existence and its mission.

Tokens have utility on their own as a means of HODL, but they are also woven into the App and games mechanics and will be used in the future to purchase various enhancements or earn additional rewards.

The combined inflationary-deflationary tokenomics of the project with the token burning system assumes a long period of functioning and development - years! Maybe even light years.

3. Multifunctional Application (Multi-app)

PPKAS personal digital universe. In this super-application every even sophisticated user will find something new and useful - entertaining content in the form of mini-games, educational content - Kaspa quiz and AI-bot, and even the opportunity to increase your tokens thanks to the space mining farm, the system of loot boxes, as well as the ability to attract referrals.

Rating system and the ability to gather with friends in clans, rates of our favorite cryptocurrencies and useful links, daily and global tasks - the whole world inspired by Kaspa is inside!

4. Games

Entertainment component of the project, but also an opportunity to accumulate valuable energy for the functioning of your mining farm in Moon Park.
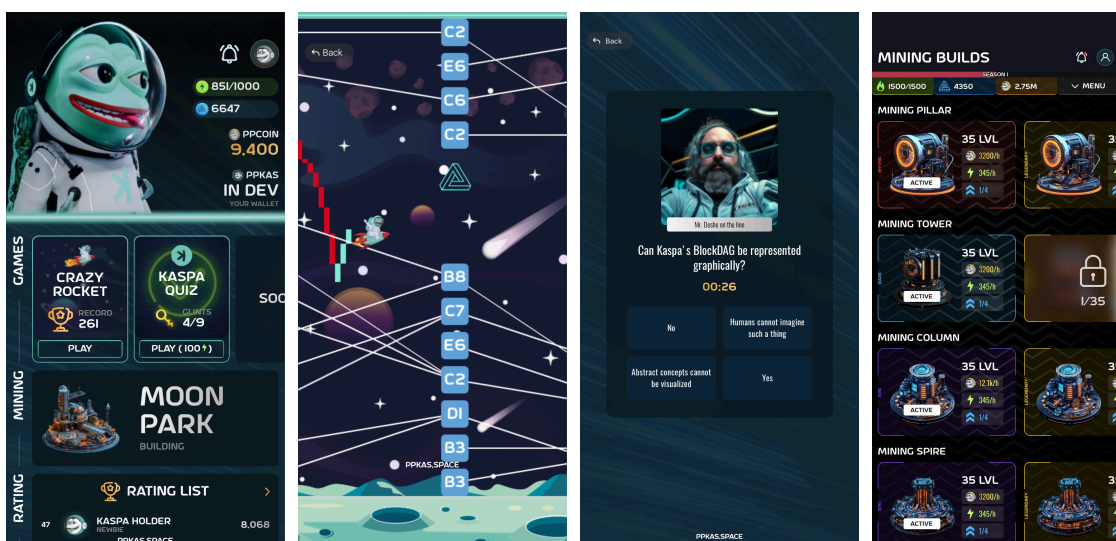

The platform suggests adding new fun and unobtrusive games from time to time, so that users do not get bored. And for fresh impressions will be implemented a system of boosts and skins, as well as daily tasks.

In addition to purely entertaining games, a series of intellectual tasks is planned. First such test will be a "Kaspa quiz" about the world of Kaspa, where every expert will be able to use his knowledge in practice.

The centerpiece of the game system will be a mining farm right on the Moon Park of PPKAS itself. A well-thought-out system of construction and improvement of the farm elements will be available for open space miners, as well as the possibility of its maintenance. The result of the farm, powered by energy mined in mini-games, will be in-game PPCOIN coins, which the player will be able to exchange for the most valuable asset of the entire ecosystem - PPKAS tokens.

There will also be a system of daily and premium loot boxes, where you can get additional energy, various improvements, boosts and skins for your PPKAS and its spaceship-rocket.

You can get additional opportunities by bringing your friends and acquaintances to the app as referrals. You will receive % of the tokens they earn, as well as a one-time reward.
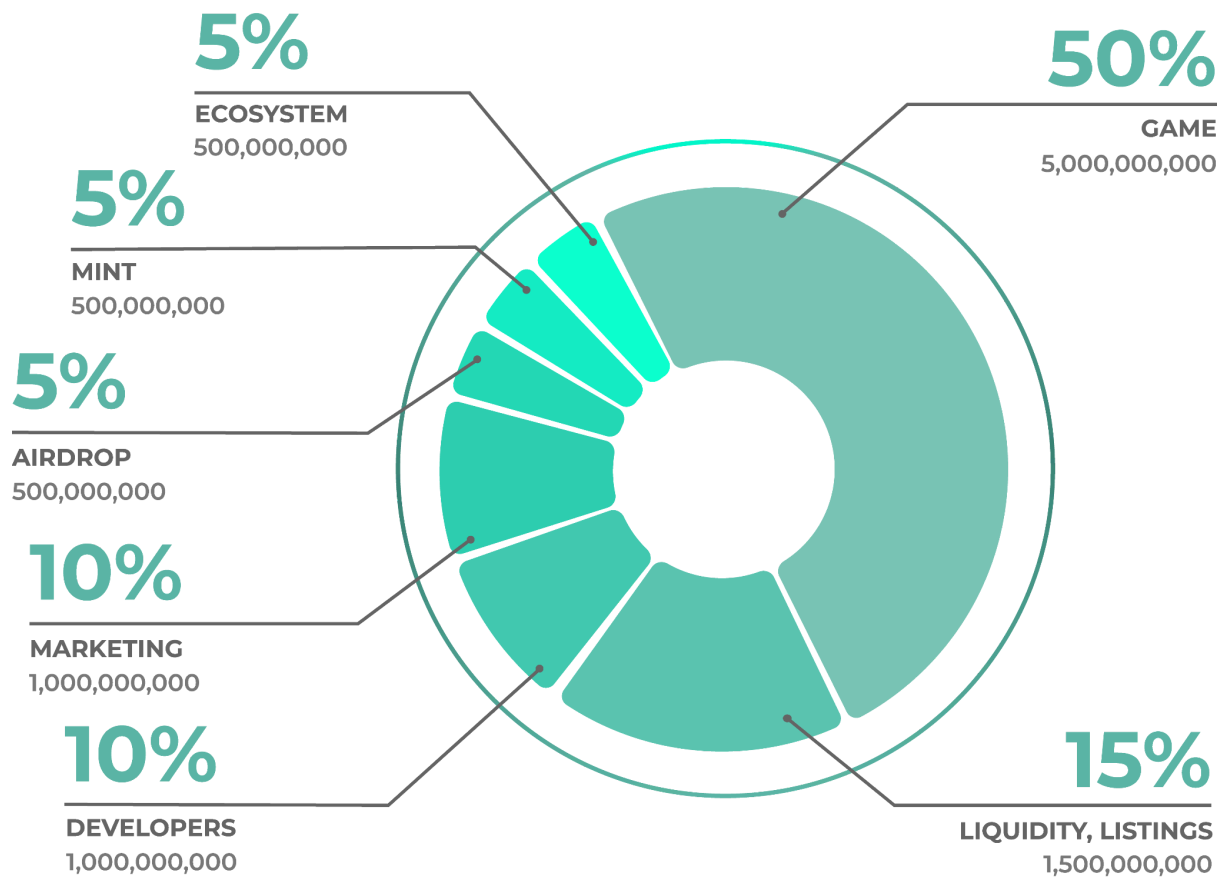

5. NFT Collection

Set of 2641 (the magic number in the Kaspa ecosystem) NFT will feature PPKAS in all his glory in various cosmic situations. Can be used both as a keepsake and an asset for sale/exchange, and have functional applicability within the game, helping players.

6. Tokenomics

5%
ECOSYSTEM
500,000,000

5%
MINT
500,000,000

5%
AIRDROP
500,000,000

10%
MARKETING
1,000,000,000

10%
DEVELOPERS
1,000,000,000

50%
GAME
5,000,000,000

15%
LIQUIDITY, LISTINGS
1,500,000,000

Initial Total Supply: 10,000,000,000 PPKAS
Minted Supply: 500,000,000 PPKAS
Minted in batches: 5000 PPKAS
Mint Opportunities: 100,000
Mint price: 1 PPKAS = 0.0002 KAS

Fair launch, no pre-sales. We plan to list on all popular centralized and decentralized exchanges, as well as aggregators (follow the news in our social networks, links below).

Tokenomics and coin distribution will be as transparent as possible for the community, the addresses of the project token holders have been publicly disclosed.

Developer funds will initially be frozen and will start to be gradually unlocked 12 months after the mint.

Tokenomics includes mechanisms for deflation and token burning.

Play and earn!

7. Roadmap

Q2 2024

- ☑ Formalization of the concept and team assembly
- ☑ Website development
- ☑ Release of WhitePaper and calculation of ecosystem tokenomics
- ☑ Launch of the project's social media platforms (Telegram, X, Discord, etc.)
- ☑ Deployment of the PPKAS token on the test network
- ☑ Closed alpha version of the game launch

Q3 2024

- ☑ Deployment and minting of PPKAS tokens on the main network (upon completion of KRC-20)
- ☑ Establishment of an NFT collection
- ☑ Development of gaming mechanics
- ☑ Launch of the game's beta version with single-player PvE mechanics
- ☑ Introduction of an AI learning assistant about Kaspa (TG AI bot)

Q4 2024

- ☑ Marketing campaign initiation
- ☑ First DEX listing
- ☑ First CEX listing
- ☑ Collaborations with other projects of Kaspa ecosystem
- ☑ Kaspa Quiz release in Multi-app

Q1 2025

- ☐ Listings on aggregators
- ☐ Cold wallet support
- ☐ CEX listings
- ☐ AI-bot open beta
- ☐ Base version of Core mechanics in Multi-app
- ☐ Worldwide Multi-app open beta
- ☐ Airdrop for beta testers
- ☐ Formation of new partnerships
- ☐ NFT collection release (upon completion of KRC-721)

Q2 2025

- ☐ New web-portal
- ☐ Full Version of Core mechanics in Multi-app
- ☐ New mini-games in Multi-app
- ☐ App localization
- ☐ HODL profit system
- ☐ Second NFT collection launch
- ☐ AI-bot full release
- ☐ Support for Kaspa promotion

Q3 2025

- ☐ Development of new game mechanics
- ☐ Top tier CEX listing
- ☐ Game updates and championships
- ☐ Merchandise marketplace

Q4 2025 and beyond

- ☐ Introduction of new game mechanics
- ☐ DAO

9. Disclaimer

General Disclaimer

This whitepaper is intended for informational purposes only. It does not constitute an offer to sell, a solicitation to buy, or a recommendation for any tokens, NFTs, or participation in related games. The content may change and may not be complete or current. The information in this whitepaper is not investment, financial, or trading advice. For such guidance, please consult a licensed financial advisor. There are no assurances of income or returns from this project. The value of tokens and NFTs can fluctuate, posing a risk to your investment.

Regulatory Compliance

Ensure your participation complies with local laws and regulations. We are not liable for any legal consequences arising from your involvement.

Risks and Liability

Participation in this project involves risks such as market volatility and security concerns. By participating, you accept these risks. We and our affiliates are not responsible for any damages resulting from your use of this whitepaper or participation in the project.

Forward-Looking Statements

This whitepaper may contain forward-looking statements subject to risks and uncertainties. Actual results may differ. We are not obligated to update these statements.

No Warranty

The information provided here is "as is," without any warranties, express or implied.

Acceptance of Terms

By reading this whitepaper and participating in the project, you agree to these terms. If you do not agree, please do not participate.

10. FAQ

What is KRC-20?

Kasplex introduces the KRC-20 token standard, which defines a set of rules and conventions for creating and managing fungible tokens on the Kaspa. Kasplex functions as a fundamental infrastructure for constructing versatile solutions on the Kaspa, enabling easy project launches with a three-part system (Protocol, Indexer, APIs).

For more information, please visit https://www.kasplex.org

Where can I download your app?

The app is currently in closed beta testing, but we plan to make it open to everyone on the Telegram platform soon!

Where can I purchase your NFTs?

Our NFT collections will be available on marketplaces after implementation of KRC-721 protocol.

Did PPKAS have a presale?

PPKAS will have a fair launch. A fair launch guarantees equal opportunities for everyone to acquire tokens without pre-sales and offers an equal chance to earn tokens in the game.

Will PPKAS offer airdrops?

Yes, our tokenomics provides rewards and prizes for active community members.

Does PPKAS receive donations?

No, the development of the project is carried out with personal funds of the developers.

Who are the developers?

Doxing of the team will be done later. We can say that we are passionate fans of Kaspa, active members of its community since 2021.
