

# 1. Introduction

## Why Kaspia

Kaspia, one of the fastest blockDAGs in the world and the fastest scalable decentralized open source PoW, is moving to the new Rust codebase and getting its Kasplex protocol with the ability to issue its own KRC-20 and KRC-721 tokens and NFTs. We want to use this chance to bring the technological marvel that is Kasplex to as many people as possible and to greatly expand the project's community.

## Why we (mission of the PPKAS project)

Our team has been in Kaspia ecosystem almost since day one of the network's launch and has accumulated enough knowledge and experience that can now be converted into a new ecosystem - an ultimatum meme token **PPKAS**, a colorful collection of NFTs and an exciting game that will help you immerse yourself in the amazing world of Kaspia.

## 2. Token

Our space hero PPKAS is brave and energetic, he is always ready for adventure and new discoveries, and can come to the aid of anyone who needs new knowledge about Kasper.

The PPKAS token (ticker PPKAS) will live its life as a self-sufficient asset, as well as use its charisma in the NFT collection and help you with its superpowers in the game.

## 3. NFT

A generative collection of 2641 (the magic number in the Kasper ecosystem) NFT will feature PPKAS in all his glory in various cosmic situations. Can be used both as a keepsake and an asset for sale/exchange, and have functional applicability within the game, helping players.

## 4. Game

The mobile game sends the player on a space journey in which you can team up with friends, and compete with other players, and at the same time earn money!

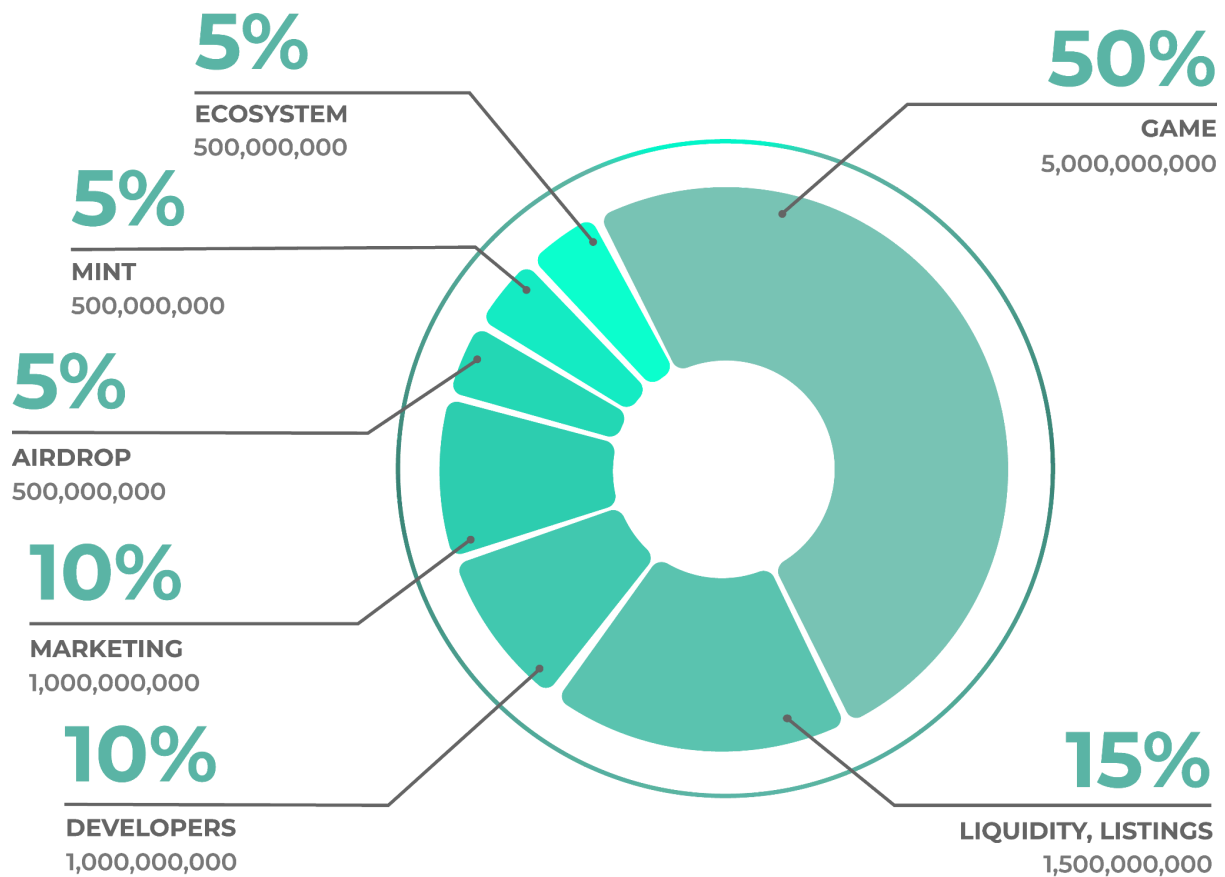

In this journey, the player and his pet PPKAS will have to overcome obstacles and survive in outer space while collecting valuable coins, build their own mining farms right on the spaceship, team up with friends in starship crews to achieve great goals, and learn a lot about Kaspa and use their knowledge to earn additional rewards.

In the course of the game, PPKAS tokens are mined, because PPKAS tokenomics is for a fair, fun and educational token distribution.

## 5. Tokenomics

**Initial Total Supply:** 10,000,000,000 PPKAS

**Minted Supply:** 500,000,000 PPKAS

**Minted in batches:** 5000 PPKAS

**Mint Opportunities:** 100,000

**1 PPKAS = 0.0002 KAS**

Fair launch, no pre-sales. We will announce the date and time for the minting of the PPKAS token in advance. Tokenomics and coin distribution will be as transparent as possible for the community, with addresses holding project tokens publicly disclosed.

Developer shares will begin to unlock gradually 3 months after token deployment.

Tokenomics include deflationary mechanisms and token burning.

**Play and earn!**

## 6. Roadmap

### Stage 1 (Q2 2024)

- Formalization of the concept and team assembly
- Website development
- Release of WhitePaper and calculation of ecosystem tokenomics
- Launch of the project's social media platforms (Telegram, X, Discord, etc.)
- Deployment of the PPKAS token on the test network
- Closed alpha version of the game launch

### Stage 2 (Q3 2024)

- Deployment and minting of PPKAS tokens on the main network (upon completion of KRC-20)
- Establishment of an NFT collection
- Development of gaming mechanics
- Launch of the game's beta version with single-player PvE mechanics
- Introduction of an AI learning assistant about Kaspera (TG AI bot)

### Stage 3 (Q4 2024)

- Airdrop for beta testers and ambassadors
- Initiation of marketing campaigns
- NFT collection release (upon completion of KRC-721)
- Listing on a decentralized exchange (DEX)
- Listing on aggregators
- Collaborations with other mascots within the Kaspera ecosystem
- CEX listing
- Support for Kaspera promotion
- App localization

## Stage 4 (Q1 2025)

- PvP mode release
- Top tier CEX listing
- Introduction of new game mechanics
- Launch of a second NFT collection
- Formation of new partnerships
- Game updates and championships
- Prizes distribution
- Merchandise marketplace

### **Acceptance of Terms**

By reading this whitepaper and participating in the project, you agree to these terms. If you do not agree, please do not participate.

## 9. FAQ and Terms

### What is KRC-20?

Kasplex introduces the KRC-20 token standard, which defines a set of rules and conventions for creating and managing fungible tokens on the Kasper. Kasplex functions as a fundamental infrastructure for constructing versatile solutions on the Kasper, enabling easy project launches with a three-part system (Protocol, Indexer, APIs).

For more information, please visit <https://www.kasplex.org>

### How can I buy PPKAS?

At the moment, mint of all available tokens is complete, but you can buy PPKAS in a special Telegram bot [https://t.me/kspr\\_home\\_bot](https://t.me/kspr_home_bot)

### Where can I purchase your NFTs?

Our NFT collections will be available on marketplaces after implementation of KRC-721 protocol.

### What will be the DEX for PPKAS?

After the implementation of KRC-20 on the mainnet Kasper, there will certainly be various DEXs listing \$PPKAS. The tokenomics plan includes providing liquidity for DEXs and additional listings on CEXs.

### Where can I store PPKAS?

KRC-20 tokens currently have support in the KasWARE wallet <https://www.kasware.xyz> and the KSPR Telegram bot [https://t.me/kspr\\_home\\_bot](https://t.me/kspr_home_bot)

Other well-known Kasper wallets are likely to add KRC-20 support later as well.

### Did PPKAS have a presale?

PPKAS will have a fair launch. A fair launch guarantees equal opportunities for everyone to acquire tokens without pre-sales and offers an equal chance to earn tokens in the game.

### Will PPKAS offer airdrops?

Yes, our tokenomics provides rewards and prizes for active community members.

## Does PPKAS receive donations?

No, the development of the project is carried out with personal funds of the developers.

## Who are the developers?

Doxing of the team will be done later. We can say that we are passionate fans of Kaspa, active members of its community since 2021.
